

ABSTRACT

G-IB-179

MASON-DIXON LINE: MILESTONE NO. --- (181)

1767 (mound), 1902 (monument)

Finzel, Maryland vicinity

Public/private

Milestone No. --- (181) and its mound of earth, on the west slope of Little Savage Mountain, mark Mason and Dixon's 167th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, the English provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. The monument is a very plain, dressed marble post with a low pyramidal top, quarried and carved in Cockeysville, Maryland; is in very good condition, unaltered, firmly set; measures about 10 inches square by about 18 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when this site was surveyed and marked with a cairn), and 1902 on the west side (when this <sup>new</sup> monument was added to the mound during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary). The mound of earth is a small low one, <sup>in very good condition, and</sup> measures about 9 feet in diameter by about 1½ feet high at the center, with the monument replacing the former <sup>original</sup> wood centerpost. On the national and state levels, No. --- (181) and the mound are significant primarily as <sup>being</sup> among the thematic group series of some 248 markers still visually defining the West Line. Locally, as among the 42 markers along the present Garrett/Somerset-Fayette county boundary, they are also significant symbolically for their relationship to the colonial and Civil War heritage of these counties.

Milestone No. --- (181) and its small mound of earth mark Mason and Dixon's 167th mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. The monument was new in 1902 when added to the center of the mound during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Of Cockeysville marble, it is a very plain post with a low pyramidal top; is in very good condition, firmly set, unaltered; measures 10 inches square by about 18 inches high above the mound; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1767 on the east side (when this site was surveyed and marked <sup>presumably</sup> with a cairn), and 1902 on the west side. The mound, now measuring about 9 feet in diameter by about 1½ feet high at the center, is presumably the remains of the original cairn; is also in very good condition, and <sup>seems</sup> unaltered except for the substitution of the monument for the original wood post long since gone.

The area here is <sup>hilly</sup> on the west slope of Little Savage Mountain. The area here is farmed land surrounded by woodlands, sparsely settled. The site is within Election District 9 of Garrett County, MD, and Greenville Township of Somerset County, PA; about 1 mile northeast of the small village of Finzel, MD; about 2 miles southeast of the settlement of Pocahontas, PA; at a point about 600 feet east of Sampson Rock Road at the Line and about 200 feet north of the Road <sup>at its bend</sup>, about 50 feet east of an old north-south split rail fence and open field, in the west edge of a mixed deciduous-hemlock woods. It cannot be seen from any road, <sup>or pipeline</sup> nor easily from closeby, and seems protected by this obscurity.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill to visually re-establish the Maryland-Pennsylvania boundary, was quarried and carved in Cockeysville, MD, of a white, fine-grained marble called saccharoidal dolomite or magnesian limestone. It was originally cut about 10 inches square by about 4½ feet long, intended for setting about 1½ feet above ground, with the remaining 3 feet for setting into the ground. The letters and numbers are blocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the top planes and apex are all clear and intact, except for chips at the top corners and vertical edges (especially on the west side). The mound also seems intact.

CONTINUE ON SEPARATE SHEET IF NECESSARY (see Thematic Group NR nomination form for full descriptions of the various kinds of monuments added to this part of the West Line, and the original mounds)

STATEMENT OF SIGNIFICANCE

Milestone No. ---(181) and its small mound of earth are significant on the national and state levels primarily as being among the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This site was surveyed and (presumably) marked by a cairn in 1767, and the Cockeysville marble monument set in the center of the mound in 1902, during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as among the 42 markers along the present Garrett/Somerset-Fayette county boundary, No. ---(181) and mound are also significant symbolically for their identifiable relationship to the colonial and Civil War heritage of these counties.
